GENERAL SALES CONDITIONS

INTRODUCTION
All the hereunder conditions are intended and accepted for each order you send to us.
Prices do not include VAT and extra fees eventually needed. Any change in prices will be agreed before the delivery.

1. ORDERS
All orders are accepted and executed on the basis of the following conditions, which will govern future deliveries, even when not reproduced.
All orders should be sent to us by fax or e-mail. Except in case of different agreements, we will debt a fixed contribution of € 15,00.
= (as partial reimbursement for bank and customs fees).

2. DELIVERIES
Goods are delivered at the buyer's risk.
Quoted times for delivery are not binding. Buyers cannot refuse the goods or ask for a reimbursement in case of delayed delivery.

3. COMPLAINTS AND RETURN OF GOODS
The client must check the condition of the goods upon its arrival and, in case of damage, to take the proper actions.
Shortcomings in quantity and quality may be claimed in written form, within 8 days from the receipt of the goods.
If the claim is prompt and justified, Buyers have exclusively entitlement to replacement of the products.
Abatements as well as making good of direct or indirect loss shall not be possible.

4. PAYMENTS
If the customer defaults on the payment of an invoice or an installment, any and all other outstanding invoice amounts or installments shall immediately become due and payable. Consumers shall pay interest on the money debt during the time of default of € 25,00 plus a 7 points above the base rate. As far as Business Enterprises are concerned, we reserve the right to prove and claim a higher damage caused by the delay in payment.
In these cases, we will be unable to accept and execute any further orders until the settlement has been received.

5. TECHNICAL DATA
We reserve ourselves the right to modify the technical data stated, at any time and without notice.
On request, we will give assistance to the customers for the best use of the products, on the basis of available experience.

6. CONTROVERSIES
In case of lawsuits the competent court will be the one in Treviso.

7. PRIVACY
Our privacy policy updated in accordance with articles 13-14 of EU Regulations 2016/679 is available on our website www.cmngroup.eu, section "Conditions and Privacy".

INFORMATION about plastic material

Acclimatize the plastic materials, the products and the accessories you have to use.
They have to be at the same temperature when worked.
The best temperature required is between 18° and 25°C, in any case never lower than 10°C.
Avoid from sudden temperature changes.

The whole range of acrylic resins sheets (both cast and extruded) has a poreless surface, on which dirt seldom sticks.
When dusty, it can be polished with water, a soft cloth or a sponge but do not dry-rub.
In order to get a perfect cleanliness as well as to remove any trace of dust on the surface, we suggest your using an antistatic solution.

FORMULATION OF COLOURED SHEETS
Despite the extreme care with sheets are produced, variations in shades may occur from one production batch to another caused by different batches of dyes.
It is recommended not to use different production batches in the same final product.

THICKNESS TOLERANCE

(ISO 7823-1 compliance)

SHEETS

Nominal Thickness (mm.)	Tolerance (mm.)
1,5 - 2	+ / - 0,6
2,5 - 5	+ / - 0,9
6	+ / - 1,0
8	+ / - 1,2
10 -12	+ / - 1,6
15	+ / - 1,9
20	+ / - 2,4
25	+ / - 2,9

BLOCKS

Nominal thickness (mm.)	Minimum Nominal (mm.)	Maximum Nominal (mm.)
25	24	27
30	29	32
35	34	37
40	39	42
45	44	48
50	49	53

DIMENSIONAL TOLERANCE

STANDARD SHEET: Estimated tolerance + / - 10 mm.

CUT TO MEASUREMENT SHEET: Estimated tolerance + / - 1 mm.

EXAMPLES OF COMPARATIVE THERMAL DILATATION

Please consider the following data sheet as an example.

Comparison between the thermal dilatation of different plastic materials and other elements.

White sheets Length 2.000 mm. and Width 800 mm. (concerning a raise in temperature of 25°).

Specific tecnical schedule on request.

Material	Initial	Thermal dilatation in mm.	
		Length	Width
Polyethylene	LD PE	10,00	4,00
Polycarbonate	PC	3,20	1,30
Acrylic resin	PMMA	3,80	1,50
Polypropylene	PP	7,00	2,80
Polystyrene	PS	3,50	1,40
	SAN	4,00	1,60
	ABS	4,00	1,60
PVC rigid and foam	PVC	3,80	1,50
Wood		0,30	0,10
Aluminium		1,20	0,50
Iron		0,50	0,20
Steel		0,60	0,20

P.S. Coloured or painted sheets under sunlight can heat easier than white ones.

N.B. These data are lab results (written on producers' catalogues) and even if they can be reliable, they cannot be considered as a guarantee.

ACRYLIC PMMA

ECOGLAS SOLID CAST ACRYLIC

Cast PMMA sheets and blocks clear and opal, easier to work (thermoforming, bending, milling) than the extruded acrylic sheets.
Resistant to humidity, they can be used for both indoor and outdoor applications.
Ideal for signs, displays, furniture, noise barriers.

For whole pallets and cuts please ask for a quotation.

ACRYLIC PMMA

SETACRYL SOLID CAST ACRYLIC

Cast PMMA sheets, easier to work (thermoforming, bending, milling) than the extruded acrylic sheets.
Resistant to humidity, they can be used for both indoor and outdoor applications.
Ideal for signs, displays, furniture, noise barriers.

SETACRYL: cast acrylic sheets range with a glossy surface on both sides.
GREEN CAST SETACRYL: 100% recycled and recyclable cast acrylic sheets range with a glossy/glossy surface.
SETALED: cast acrylic sheets range developed for LED backlighting.

For whole pallets and cuts please ask for a quotation.

ACRYLIC PMMA

MADREPERLA SOLID CAST ACRYLIC

POLARLITE: cast acrylic sheets with one side matt and one side glossy.
SATINGLAS: cast acrylic sheets range with a satin/satin surface.
METALLIC: cast acrylic sheets that combines the characteristics of PMMA with a metallic look.
SETA-LETTER: cast acrylic sheets range with a one side matt surface created to help the creation of logos, letters and signs of high thickness.
IRIDIS: cast acrylic sheets that combines the characteristics of PMMA with a pearly iridescent effect.
STONE: cast acrylic sheets that combines the characteristics of PMMA with a natural stone effect.
For whole pallets and cuts please ask for a quotation.

Polyethylene and Teflon tubes and rounds available upon demand

Poliurethane TF250 high density sheets

Easy-to-work rigid polyurethane foam sheet, resistant to compression and workable with any tool for wood and stone, easy to paste to different surfaces, waterproof, non-toxic and insulating.

Good for advertising signs, logos, 3d letters and also illuminated signs.

Density **250** kg/m3. Peach color.

Gree 600 Poliurethane sheets

Green 600 is the new high-performance polyurethane board made by upcycling high-quality secondary production products. Thanks to the high percentage of recycled raw material, these high-density boards combine sustainability, technical performance and aesthetic requirements. In addition to the insulating properties typical of polyurethane, they offer excellent physical and mechanical performance in terms of strength, screw retention, low water absorption and workability, making the material suitable for a variety of applications. Ideal for creating letters and shapes for painted signs, including for outdoor use.

Size mm.	Thickness mm.	€ /sq.m. Green	€ /Sheet Green	Picture

POLYCARBONATE

SOLID POLYCARBONATE

Solid polycarbonate sheets with high transparency, almost like glass.
Ideal anywhere a high sound-proof and thermal insulation is required in combination with shockproof and lightness.
Easy to work (cutting, no thermoforming, bending) for signs, displays, covering.

For whole pallets and cuts please ask for a quotation.
Anti-scratch sheets for special usage on demand.
Sheets up to 6100 x 2500 mm on demand.
UV protection on both sides on demand.
Clear embossed/bronze sheets on demand.

EASYCARB SHEETS: OPAL WHITE UV LED

NEW

Compact opal polycarbonate with very high light diffusion and light transmission.
When backlit, it produces results comparable only to those of the best methacrylate sheets, while combining the superior characteristics of PC in terms of workability, impact and temperature resistance and fire rating (B-s0-d1).

LEXAN SHEETS: CLEAR - OPAL ON DEMAND

POLYCARBONATE

MULTIWALL POLYCARBONATE

Multiwall polycarbonate sheets with sound proof and thermal insulation as well as shockproof.
The U.V. protection grants you a long life of the surface even after a long sun orientation or atmospheric agents actions.
Ideal for covering, windows, walls, etc.

For whole pallets and cuts please ask for a quotation.
Sheets with special surfaces, length and thickness on demand.
Sheets with UV protection film on both sides on demand.
Warranty 10 years.

PVC RIGID FOAM SHEETS

EASY DIGITAL
PVC Foam Board Sheet semiopaque excellent appearance, good internal strength (run out), printable.
Characteristics: strength, excellent resistance to impact, weathering, U.V., chemicals and corrosive (DIN 8061-App.1), no absorption of water and/or moisture, self-extinguishing Class 1, PE protective film on a side.
Applications: signage, printing, display digital, wall cladding, partitioning, fabrication, furniture, letters, shop outfitting, insulation panel, false ceiling, models, shelving and backing panels for illuminated sign boxes.
Installation tips: If several panels are placed side by side, ensure that they are all installed in the same orientation with respect to the direction of extrusion.

EASY BLUE PVC
PVC Foam Board Sheet semiopaque excellent appearance, good internal strength (run out), printable.
Characteristics: strength, excellent resistance to impact, weathering, U.V., chemicals and corrosive (DIN 8061-App.1), no absorption of water and/or moisture, self-extinguishing Class 1, PE protective film on a side.
Applications: signage, printing, display digital, wall cladding, partitioning, fabrication, furniture, letters, shop outfitting, insulation panel, false ceiling, models, shelving and backing panels for illuminated sign boxes.
Installation tips: If several panels are placed side by side, ensure that they are all installed in the same orientation with respect to the direction of extrusion.

COESTRUSED PVC

EASY DIGITAL ECOEX

Boards that combine a recycled PVC core with virgin white PVC surfaces to provide a high quality print substrate with excellent environmental credentials

Smooth virgin PVC surface on both sides of the sheet; bright opaque white for excellent printing results, hard and scratch resistant because it is high density foam.

Black core made from recycled foam (92%).

Lightweight and rigid, ideal for all kinds of printing and display applications: signage, printing, displays, furniture and exhibition stands. By engraving the face with a cutter, the black core can be made to appear, resulting in impressive decorations and lettering.

CARDBOARD SANDWICH

The ecological solution, ideal for indoor applications

VERTICAL WAVE CORE STRUCTURE - cell XXL

Lightweight, fully cardboard sandwich panel, 100% recyclable, for indoor applications.
The honeycomb core with sinusoidal cell, also called vertical corrugated
- provides very high compressive strength and stiffness
- enables the highest quality in cutting, shaping, gluing and laminating operations
- produces well-defined edges in V-incision and folding operations

For creating displays, pop displays, promotional stands, shelves, furniture, chairs.
Can be printed with UV inkjet technology or screen printed.
The cardboard sandwich panel in the largest format.
