ROAD SIGN PLATES

STEEL BOXED EDGE PLATES WITH FASTENINGS

The plates are for signaling and they are stored in iron boxes, resting against one another.
It is therefore very probable and frequent that the paint is streaked during the warehouses movements.
Being designed for road signs these tables are always sanded and completely covered with film, they are not born to be worked directly on the painted surface.
For these reasons we can not guarantee the integrity and perfection in the painting.

ROAD SIGN PLATES

ALU BOXED EDGE PLATES WITH FASTENINGS

The plates are for signaling and they are stored in iron boxes, resting against one another.
It is therefore very probable and frequent that the paint is streaked during the warehouses movements.
Being designed for road signs these tables are always sanded and completely covered with film, they are not born to be worked directly on the painted surface.
For these reasons we can not guarantee the integrity and perfection in the painting.
