GENERAL SALES CONDITIONS

INTRODUCTION
All the hereunder conditions are intended and accepted for each order you send to us.
Prices do not include VAT and extra fees eventually needed. Any change in prices will be agreed before the delivery.

1. ORDERS
All orders are accepted and executed on the basis of the following conditions, which will govern future deliveries, even when not reproduced.
All orders should be sent to us by fax or e-mail. Except in case of different agreements, we will debt a fixed contribution of € 15,00.
= (as partial reimbursement for bank and customs fees).

2. DELIVERIES
Goods are delivered at the buyer's risk.
Quoted times for delivery are not binding. Buyers cannot refuse the goods or ask for a reimbursement in case of delayed delivery.

3. COMPLAINTS AND RETURN OF GOODS
The client must check the condition of the goods upon its arrival and, in case of damage, to take the proper actions.
Shortcomings in quantity and quality may be claimed in written form, within 8 days from the receipt of the goods.
If the claim is prompt and justified, Buyers have exclusively entitlement to replacement of the products.
Abatements as well as making good of direct or indirect loss shall not be possible.

4. PAYMENTS
If the customer defaults on the payment of an invoice or an installment, any and all other outstanding invoice amounts or installments shall immediately become due and payable. Consumers shall pay interest on the money debt during the time of default of € 25,00 plus a 7 points above the base rate. As far as Business Enterprises are concerned, we reserve the right to prove and claim a higher damage caused by the delay in payment.
In these cases, we will be unable to accept and execute any further orders until the settlement has been received.

5. TECHNICAL DATA
We reserve ourselves the right to modify the technical data stated, at any time and without notice.
On request, we will give assistance to the customers for the best use of the products, on the basis of available experience.

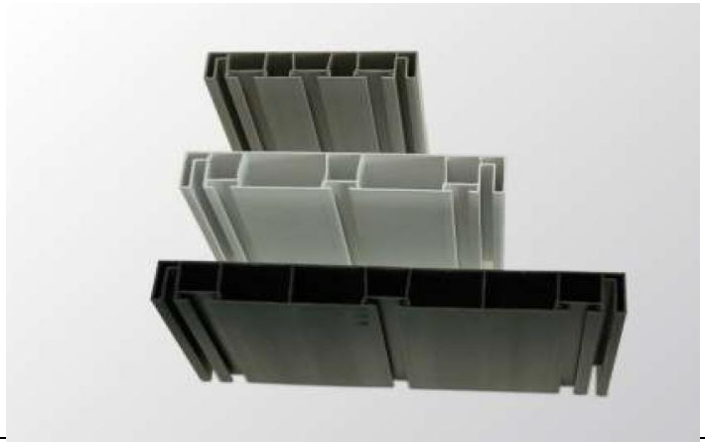

6. CONTROVERSIES
In case of lawsuits the competent court will be the one in Treviso.

7. PRIVACY
Our privacy policy updated in accordance with articles 13-14 of EU Regulations 2016/679 is available on our website www.cmngroup.eu, section "Conditions and Privacy".

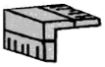

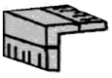

PVC PROFILES FOR LIGHTBOXES

SYSTEM 4

Profiles and accessories suitable for making lightboxes with low equipment.
Easy to cut and assemble.
Front and bottom thickness max. 4 mm.

ALUMINIUM PROFILES FOR LIGHTBOXES

PROFILES 80

Profile for single or double sided lightboxes with rigid front and back panels up to 4 mm thick.
The 20x20 mm L profile is fixed with screws onto the 73 mm profile to obtain a side that could be open to let the front panel slide out.
To ease mounting and internal ispection it is necessary that at least one side of the lightbox is made with these profiles, the other sided are made with the 80 mm profile.
The FSQ corners are used both to join mitred corners and to mount reinforcements made with 15x15 mm square tube.
The sides of front and back panels must be 7 mm shorther than the overall dimensions of the lightbox to accomodate thermal expansion.

For NEON lighting see Ch. 5 (NEON lighting).
For modules and power supplies see Ch. 6 (LED lighting).

ALUMINIUM PROFILES FOR LIGHTBOXES

PROFILES 80

Extruded aluminium profile for light boxes.
Ideal for small single-sided light boxes.
Profile size 80 mm total complete with profile 73 + 20x20 corner piece.
Use sheets with a maximum thickness of 4 mm.
Internal brackets can be used for 45° profile cuts, or corner pieces or curves (with end caps) for 90° profile cuts.

For NEON lighting systems, see Chapter 5 (NEON lighting).
For LED modules and power supplies, see Chapter 6 (LED lighting).

Please note: to obtain the desired box dimensions when using FCUR curves or FANG corner pieces, it is necessary to reduce the length of the profiles by 100 mm (FCUR) and 40 mm (FANG).

ALUMINIUM PROFILES FOR LIGHTBOXES

PROFILES 120

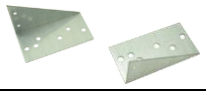

Extruded aluminium profile for light boxes.
Ideal for small and medium-sized single-sided light boxes.
Profile size 120 mm total complete with profile 113 + 20x20 corner piece.
Use sheets with a maximum thickness of 4 mm.
Internal brackets can be used for 45° profile cuts, or corner brackets or curves (with end caps) for 90° profile cuts.
We recommend reinforcing the structure using an internal support tube.

For NEON lighting systems, see Chapter 5 (NEON lighting).
For LED modules and power supplies, see Chapter 6 (LED lighting).

Please note: to obtain the desired box dimensions when using FCUR curves or FANG corner pieces, it is necessary to reduce the length of the profiles by 100 mm (FCUR) and 40 mm (FANG).

ALUMINIUM PROFILES FOR LIGHTBOXES

PROFILES 150

Extruded aluminium profile for light boxes.
Ideal for medium and large single-sided and double-sided light boxes.
Profile size 150 mm total complete with profile 143 + 20x20 corner piece.
Use sheets with a maximum thickness of 4 mm.
Internal brackets can be used for 45° profile cuts, or corner brackets or curves (with end caps) for 90° profile cuts.
We recommend reinforcing the structure using an internal support tube.

For NEON lighting systems, see Chapter 5 (NEON lighting).
For LED modules and power supplies, see Chapter 6 (LED lighting).

Please note: to obtain the desired box dimensions when using FCUR curves or FANG corner pieces, it is necessary to reduce the length of the profiles by 100 mm (FCUR) and 40 mm (FANG).

ALUMINIUM PROFILES FOR LIGHTBOXES

PROFILES 186

Profile for single or double sided lightboxes with rigid front and back panels up to 4 mm thick.
Two 25x25 mm L profile are fixed with screws onto the 186 mm profile to obtain a side that could be open to let the front panel slide out.
To ease mounting and internal ispection it is necessary that at least one side of the lightbox is made with these profiles, the other sided are made with the 200 mm profile.
The FSQ corners are used both to join mitred corners and to mount reinforcements made with 15x15 mm square tube.
The sides of front and back panels must be 7 mm shorther than the overall dimensions of the lightbox to accomodate thermal expansion.

For NEON lighting see Ch. 5 (NEON lighting).
For modules and power supplies see Ch. 6 (LED lighting).

COMHANHOLLAND ALUMINIUM

PROFILES FOR DOUBLE SIDE TEXTILE LIGHTBOXES

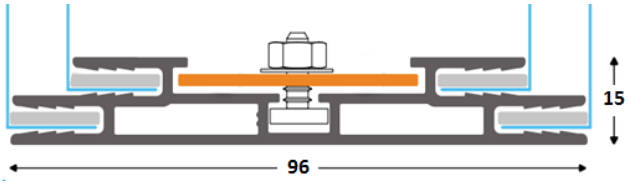

T-FLEX® 96/2

Aluminium profile for double side illuminated frames with keder-edged tensioned fabrics.
For small-to-medium wall-mounted, suspended or self-standing frames with feet.
The double channel for the keder allows the application of an inner white textile to improve diffusion and to hide the electrical parts during the printed textile changeover.
The backpanel support of T-flex 100 can be used to fix T-flex 96/2 to walls.
The use of reinforcement profiles is reccomended for sides longer than 1,5 m
Corner connectors come complete with bolts and nuts.

For LED modules and power supplies see Ch. 6 (LED lighting).

PROFILES FOR TEXTILES TENSIONING

CRYSTAL

Crystal line, made up of a wide range of profiles, is suitable for the creation of supports of any shape: from indoor structures, perfect for tensioning pictorial canvases, to outdoor structures, necessary for mega-billboards on walls or false ceilings.
The Crystal profile is light, resistant, extremely adaptable.
Easy to manipulate, cut and fix, Crystal does not cause creases in the sheets and leaves ample room for the creativity of the professional.

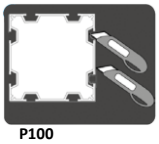

KT+ - **P100**: for the realization of frames and large format external structures.
KP - **KTN**: for the creation of small and medium format removable frames.
C - **KL+** - **KTA**: for the creation of interior architectures and graphics on vehicles.
JN: indooor universal closing profiles.
JR: outdoor universal closing profiles.

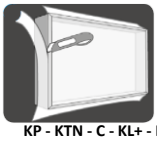

Place the sheet approx. 10 cm larger.
Secure the sheet with stoppers.
Fit the PVC profile by removing stoppers.
If required, cut the excess sheet.

KEE KLAMP JOINTS

System joints malleable cast iron easy to use, can be used with standard pipe Ø 48 mm. They offer an easy way to build tubular structures as well as an economic alternative to the welding, joints are galvanized for corrosion resistance.
To firmly lock the tube into the body of the joint, just tighten the screws with the hex wrench.

For signage poles see Ch. 2 (communication systems).
For textiles accessories see Ch. 3 (digital print)

COMHANHOLLAND ALUMINIUM

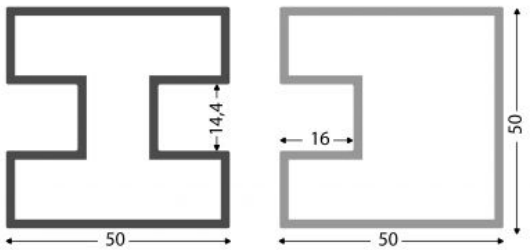

PROFILES FOR RIGID PANELS

TERRACE® 50

Profile system for separation screens with glass or plastic panels.
Perfect for social-distancing.
Very simple with just two kind of profiles, doesn't need mitred cut.
The rubber profile is used to hold glass and plastic panels 4 to 5 mm thick.
The single side adhesive foam tape is used to compensate the thickness of 8 to 10 mm thick panels.
The very wide steel feet make the screens both stable and movable.

SQUAREFIX®

SquareFix is a system of square tubes and selfclamping plastic connecting pieces perfect to build Covid protections and separation.
The wide range of components adapts all situations such as pre-existing forniture.
Joints have a steel core for maximum stiffness.
The single-winged profiles accepts panels of any thickness.
The panel is fixed to the wing by means of adhesive tapes, sealants or screws.
Textile walls can be made thank to the dedicated profile for fabrics.
SquareFix can be used for the construction of racks, poster displays, tables, but also for shop displays, fabric frames, signs.

PROFILES FOR RIGID PANELS

RoHS COMPLIANT - 2002/95/EC

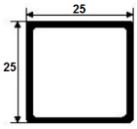

SYSTEM 25

System of aluminium square profiles and ABS joints to make cabins, boxes, walls, displays and many other self standing structures.
The structures can be assemblend in the place of installation.
Profiles for panels up to 6 mm or up to 10 mm thick are available.

FINISHING PROFILES

EDGETRIM ADHESIVE PROFILES FOR PANELS

Wide range of profiles with adhesive tape in various shapes, for finishing panel edges or for linear or corner joints. In silver anodised aluminium, some are also available in anodised gold or painted dark grey RAL7021 on request. A practical, economical and quick solution for finishing and adding rigidity. On request, also available without adhesive tape.

STRIP LED PROFILES

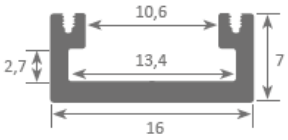

M PROFILE

Profile for flat surfaces

Compact profile in natural anodised extruded aluminium for LED bar realizations.
Accessories set available: caps, lens, racks, diffusers, etc.
Suitable for indoor use.
Excellent heating dissipation.
The profile is ideal for using on wall surfaces, furniture, shelves and similar areas, where we require a minimalist profile with very reduced dimensions.

For LED strip see Ch. 6 (LED lighting).

H PROFILE

Profile for ceiling or wall mounting

Compact profile in natural anodised extruded aluminium for LED bar realizations.
End caps included.
Suitable for indoor use.
Excellent heating dissipation.
This profile can be used for many different purposes, such as ceilings and signage, due to its ultra thin methacrylate with optical effect.
Its etched methacrylate surface makes it ideal for hanging (display signs with diffused lighting).

For LED strip see Ch. 6 (LED lighting).

CHANNEL LETTERS PROFILES

ALURAPID

Aluminium profile for easy and quick production of channel letters and lightboxes.
Very light and highly flexible it enables to make letters with very sharp angles.
A pneumatic machine enables also to the production of channel letters of large dimensions.

For rigid panels see Ch. 1 (plastic material).
For LED modules and power supplies see Ch. 6 (LED lighting).

ON DEMAND

JEWELITE F LETTER TRIM

Plastic mouldings with aluminium core that add new dimension to channel letters.
No painting or polishing necessary.
Fast fixturing with self tapping screws.

Suitable for use on 3 mm PMMA sheets.

For rigid panels see Ch. 1 (plastic material).
For LED modules and power supplies see Ch. 6 (LED lighting).

COMHANHOLLAND ALUMINIUM

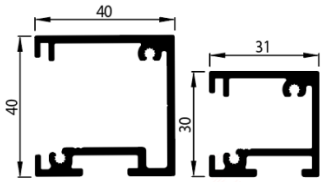

SISTEMI DI MONTAGGIO

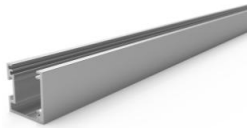

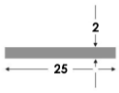

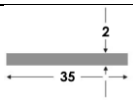

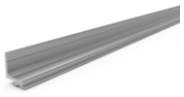

BOXLETTER CABLE CHANNEL

Practical wall mounting and wiring system for box letters. The cable channels are fixed to the wall by means of wall brackets, and can slide on them for optimal positioning. The letters are then fixed to the channel. The number of channels required is determined by the height of the letters. Fixing the cables within the aluminium cable duct increases reliability and safety, particularly with regard to fire propagation.
